Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV

ISIN: IE0002VU15G5

JPM All Country Research Enhanced Index Equity Paris Aligned Active UCITS ETF - USD (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – All Country Research Enhanced Index Equity Paris Aligned Active UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The objective of the Sub-Fund is to achieve a long-term return in excess of the Benchmark, by actively investing primarily in a portfolio of companies globally, including emerging markets, while seeking to align with the objectives of the Paris Agreement.

Investment Policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund aims to invest all of its assets (excluding assets held for ancillary liquidity purposes) in equity securities of companies globally. Issuers of these securities may be located in any country, including emerging markets.

The Sub-Fund will seek to outperform the Benchmark over the long-term, while seeking to align with the objectives of the Paris Agreement. The Benchmark is comprised of large and mid-capitalisation stocks issued by companies in developed and emerging markets globally ("Benchmark Securities"). The constituents of the Benchmark are selected from the constituents of the Solactive GBS Global Markets Large & Mid Cap USD Index PR (the "Investible Universe") and the Benchmark aims to meet the requirements for EU Paris-aligned Benchmarks as defined in the EU Climate Benchmarks Regulation and provide lower carbon emission exposure relative to the Investable Universe with a view to achieving the long-term global warming objectives of the Paris Agreement.

The Benchmark has been included as a point of reference against which the performance of the Sub-fund may be measured. The Sub-Fund will bear a close resemblance to its Benchmark.

For the avoidance of doubt, however, investors should note that the Sub-Fund will not seek to track the performance of or replicate the Benchmark, rather the Sub-Fund will hold a portfolio of equity securities (which may include but will not be limited to the Benchmark Securities) which is actively selected. While the Sub-Fund is managed with the aim of delivering an investment performance (net of fees) which exceeds that of the Benchmark over the long-term, there is no guarantee of any outperformance or any such performance may be minimal. In order to seek to achieve this, the Investment Manager may overweight the securities which it considers to have the highest potential to outperform the Benchmark and underweight or not invest at all in securities which the Investment Manager considers most overvalued.

The risk characteristics of the portfolio of securities held by the Sub-Fund, such as volatility levels, will be broadly equivalent to the risk characteristics of the Benchmark.

The Sub-Fund's portfolio will be constructed such that it aims to meet the Benchmark's obligations under the EU Climate Benchmarks Regulation, as described above. Consequently the Sub-Fund will also seek to achieve a reduction of its greenhouse gas intensity of at least 7% on average per annum and an overall reduction of its greenhouse gas intensity compared to the Investable Universe of at least 50%. In addition, whilst the Investment Manager may underweight, or not invest at all in, Benchmark Securities, the Investment Manager will not actively underweight High Climate Impact Sectors as a whole, relative to the Investible Universe.

In addition to ESG Integration, as an SFDR Article 8 fund, the Sub-Fund promotes environmental and/or social characteristics.

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 90% of securities purchased. Pursuant to the Investment Manager's ESG analysis, at least 80% of the Sub-Fund's Net Asset Value is invested in companies with positive environmental and/or social characteristics that follow good governance practices which are components of the Benchmark.

The Sub-Fund also invests at least 50% of the Sub-Fund's Net Asset Value in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions on certain industries and issuers, based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Website (www.jpmorganassetmanagement.ie).

The Investment Manager also integrates financially material environmental, social and governance ("ESG") issues as part of the Sub-Fund's investment process ("ESG Integration"). ESG Integration is the systematic inclusion of ESG issues in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG Integration by itself focuses on financial materiality and is therefore only part of a broader investment process. It is only one of the factors alongside other factors that the Investment Manager considers in portfolio construction, including buying and selling securities.

The Sub-Fund may invest in assets denominated in any currency and currency exposure in the Sub-Fund will be typically unhedged.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments ("FDI").

EUR is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Benchmark: Solactive ISS ESG Screened Paris Aligned (PAB) Global Markets Index NTR.

Distribution Policy: This Share Class will not pay dividends.

Risk and Reward Profile

Lower risk — **Higher risk**

Potentially lower reward — Potentially higher reward

1	2	3	4	5	6	7

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its simulated Net Asset Value has shown medium to high fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and lower liquidity than developed market securities respectively.
- REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.
- In respect of unhedged Share Classes in a currency other than the Base Currency of the Sub-Fund, the value of the Share Class will be subject to exchange risk in relation to the Base Currency of the Sub-Fund.
- Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, sustainability risk may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.
- The Sub-Fund seeks to provide a return above the Benchmark, however the Sub-fund may underperform the Benchmark.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from this Share Class over a year	
Ongoing charge	0.25%
Charges taken from this Share Class under certain specific conditions	
Performance fee	None

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- There is insufficient performance data available to provide a chart of annual past performance.
- Sub-Fund launch date: 2026.
- Share Class launch date: 2026.
