Capital Risk: Investing involves risk including the risk of loss of capital.

Past performance is not a reliable indicator of future performance.

CLO Debt Securities carry certain structural risks including potential subordination to the other tranches of debt in the same capital structure, volatility of underlying collateral values and potential for principal loss of the underlying assets in excess of the equity valuation. CLOs issue classes or "tranches" of securities that vary in risk and yield. Losses caused by defaults on underlying assets are borne first by the holders of subordinate tranches.

The negative target market for the Fund is basic / informed "Retail Investors" as defined in the current European MiFID template. Accordingly, the sale of this Fund on the secondary market to basic or informed Retail Investors is not permitted and the Fund shall not be offered to Retail Investors other than advanced retail investors.

State Street Global Advisors (SSGA) is now State Street Investment Management. Please go to statestreet.com/investment-management for more information.

Effective Convexity A measure of the curvature in the relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.

TER Total Expense Ratio is a fee charged to the fund, as a percentage of the Net Asset Value, to cover costs associated with operation and management of the portfolio of assets.
