Objective and Investment Policy

Amundi Label ISR Actions Japon UCITS ETF aims to provide exposure to large and mid-cap stocks in the Japanese market while enhancing environmental, social, and governance (ESG) criteria in the selection and analysis process of the portfolio holdings compared to the MSCI Japan Index (the "Benchmark"). This fund is actively managed. For more information, please refer to the fund's prospectus or the KIID.

Performances from 27/11/2024 to 31/08/2026 (Source : Fund Admin)

Risk indicators (Source: Fund Admin)

	1 year	Inception to date *
Portfolio volatility *	16.45%	17.05%
Benchmark volatility	15.98%	16.82%
Ex-post Tracking Error	2.76%	2.43%
Sharpe ratio	1.70	1.00

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Cumulative returns* (Source: Fund Admin)

Spread	1.59%	-0.20%	1.30%	1.40%	-	-	-0.09%

Calendar year performance* (Source: Fund Admin)

	2025	2024	2023	2022	2021
Portfolio	8.35%	-	-	-	-
Benchmark	10.31%	-	-	-	-
Spread	-1.97%	-	-	-	-

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

EQUITY

Risk Indicator (Source : Fund Admin)

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product in risk class 4 out of 7, which is a medium risk class.

In other words, the potential losses related to the future outcomes of the product are at a medium level, and if the market situation were to deteriorate, it is possible that our ability to pay you could be affected.

Additional risks: The market liquidity risk may amplify the variation in the product's performance.

As this product does not provide protection against market fluctuations, you could lose all or part of your investment.

In addition to the risks included in the risk indicator, other risks may affect the Fund's performance.

Please refer to the prospectus of Amundi Label ISR Actions Japon UCITS ETF.

EQUITY

SRI Terminology

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
 "E" for Environment (energy and gas consumption levels, water and waste management, etc.).
 "S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
 "G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG rating scale

Rating scale from A (best score) to G (worst score)

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).

¹ Outstanding securities in terms of ESG criteria excluding cash assets.

The decision of the investor to invest in the promoted fund should take into account all the characteristics or objectives of the fund.

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager’s minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

ENVIRONMENT:Carbon intensity

GHG intensity of investee companies – tCO2eq/€m de revenus
Source : Trucost

Coverage rate (Portfolio/Benchmark) 100% 97.49%

SOCIAL : Board gender diversity

Average ratio of female to male board members in investee companies, expressed as a percentage of all board members
Source : Refinitiv, ISS, MSCI

Coverage rate (Portfolio/Benchmark) 100% 100%

GOVERNANCE:Independent board members

Coverage rate (Portfolio/Benchmark) 100% 97.74%

RESPECT FOR HUMAN RIGHTS: decent work and freedom of association

Coverage rate (Portfolio/Benchmark) 100% 97.74%

Sources and definitions

Carbon Intensity:PAI 3 measures carbon emissions expressed in million euros (€ million) of revenue. The Greenhouse Gas intensity of the relevant portfolio is determined by calculating the portfolio weighted average of the total greenhouse gas emissions intensity per million euros of sales of the companies in the portfolio (t/EUR million sales).

Amundi relies on the data provider S&P-Trucost, whose methodology is based on the Greenhouse Gas Protocol:
Scope 1: Direct emissions generated by resources owned or controlled by the company.
Scope 2: Indirect emissions generated by the purchase or production of electricity, steam, or heat.
Scope 3: All other indirect emissions, both upstream and downstream of the value chain. For data robustness reasons, we have chosen to use emissions from upstream Scope 3 activities.

Board gender diversity:The % board gender diversity of the relevant portfolio is determined by calculating the portfolio weighted average of the percentage of board members who are female in investee companies, expressed as a percentage of all board members. The PAI indicator uses the "relevant" approach, meaning that the denominator is determined by considering the relevant portfolio. When the coverage of board gender diversity is less than 100%, the weights of the portfolio are adjusted to account for incomplete data coverage. Data source : Refinitiv, ISS, MSCI and CRISIL.

Independent board members:Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

Human rights policy:Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv
