Benchmark : MSCI Emerging Market Index (Total Return Net)	
Markets August saw emerging markets (EM) rebound, outperforming developed markets (DM) and the US. Markets regained confidence in the AI investment cycle, supported by sustained capital expenditure, strong revenue guidance during the second-quarter earnings season and shareholder-return plans from Korean memory companies.	
Helped Stock selection in information technology.	
Hurt Stock selection in industrials.	
Outlook A multi-year US dollar bear cycle, continued deficit spending in major economies, and an extended AI and infrastructure capital expenditure cycle create a constructive backdrop for EMAP equities, underpinning earnings growth across markets. Market leadership remains concentrated, though the sharp style rotation earlier in the summer, away from concentrated AI-linked positions, is a reminder that elevated valuations and higher borrowing costs can translate into a choppy path. Most EM economies excluding China continue to experience an inflationary boom favouring industrials, defence and commodities, while China shows signs of emerging from deflation.	

Past performance and forecast is not a reliable indicator of current and future results.

Fund Overview

Investment objective

The Sub-Fund aims to achieve a long-term return in excess of MSCI Emerging Market Index (Total Return Net) (the "Benchmark") by actively investing primarily in a portfolio of emerging market companies.

Month in Review

- **Within technology, Taiwanese names** led the outperformance, including Largan Precision, Wiwynn, Asia Vital Components and Advantech. Largan Precision, an optics and lens manufacturer, rallied on its strategic push into optical communications, highlighted by a major property acquisition and successful sample deliveries of co-packaged optics (CPO) products. Wiwynn, a rack-scale server and liquid-cooling provider, advanced on strong quarterly revenue growth and continued momentum in hyperscale data centre investment. Asia Vital Components, a supplier of thermal-management solutions and semiconductor components, gained on continued AI supply chain momentum, while Advantech contributed after reporting record quarterly sales supported by accelerating edge AI and industrial IoT demand.
- **Stock selection in consumer staples** also added value, driven predominantly by an overweight position in APR Corp, a South Korean beauty-tech and consumer goods company. The company outperformed after delivering record second-quarter revenue, led by strong cosmetics growth, while management also raised full-year guidance. North America remained the key growth engine, while Europe emerged as an additional growth driver.
- **At the stock level, WuXi AppTec**, a leading global contract research, development and manufacturing organization (CRDMO) based in China, was among the top contributors. The share price rose following comprehensive earnings beats, a meaningful upward revision to full-year guidance and a favourable legal development in the US that temporarily halted a restrictive military-link designation.
- **Stock selection in industrials** was the largest detractor. A lack of exposure to Hanwha Aerospace, a South Korean defence and aerospace manufacturer, weighed on performance as the company benefited from increased defence spending amid heightened regional security concerns. Elsewhere, an overweight position in CATL, a Chinese battery manufacturer, detracted as the stock declined on regulatory and operational headwinds related to its European expansion projects.
- **Stock selection in materials** weighed on performance, primarily due to the portfolio's position in AngloGold Ashanti, which rallied sharply on the back of rising gold prices.

Looking Ahead

- **A multi-year US dollar bear cycle** and deficit spending in developed economies should remain supportive for EM and Asia Pacific, but near-term dollar firmness, sticky inflation and higher energy costs could keep sentiment choppy – particularly where valuations are elevated and borrowing costs matter more.
- **Although now more advanced**, the extended AI and broader industrial/infrastructure capex cycle continue to underpin earnings momentum; as the cycle matures, we see scope for earnings participation to broaden beyond a narrow group of AI beneficiaries.
- **North Asia remains central to the AI supply chain**, with the memory upcycle intact and hyperscaler capex expectations still being revised upward, reinforcing demand even as valuations across parts of the complex have moved to elevated levels.

RISK PROFILE

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and lower liquidity than developed market securities respectively.

The Sub-Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota

The risk indicator assumes you keep the product for 5 years. The risk of the product may be significantly higher if held for less than the recommended holding period. In the UK, please refer to the synthetic risk and reward indicator in the latest available key investor information document.

limitations and also operational constraints which may result in increased counterparty risk.

The amount which foreign portfolio investor ("FPI") can invest in Indian companies is subject to quota limitations at the level of individual FPIs and of FPIs in aggregate, which may impact the ability of the Sub-Fund to invest directly in such companies. FPIs' Indian investments may also be subject to local capital gains tax, securities transaction tax and other forms of taxation, which may impact on the performance of the Sub-Fund.

The Sub-Fund may invest in securities of smaller companies which may be less liquid, more volatile and tend to carry greater financial risk than securities of larger companies.

Exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.

The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform its Benchmark.

They may not necessarily be all-inclusive and may be subject to change without reference or notification to you. The value of investments and the income from them may fluctuate in accordance with market conditions and taxation agreements and investors may not get back the full amount invested.
