This PRIIP is issued by Xtrackers Digital Markets ETC AG, the company is incorporated in Switzerland.

This Key Information Document is accurate as at 30 June 2026.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

ETC - Exchange Traded Certificate (exchange traded secured debt obligations with cryptocurrency exposure) – Asset Backed Notes.

Term

This product is not subject to any fixed term. For information on redemption possibilities please refer to section "How long should I hold it and can I take out my money early?". Xtrackers Galaxy MSCI Physical Crypto Market ETC Securities were issued in 2026.

Objectives

The aim of the ETC Securities is to provide investors with exposure to the performance of the MSCI Crypto Market Select Index (the "Index"). The Index is designed to measure the performance of a diversified basket of major crypto assets and is calculated and administered in accordance with its methodology (available at www.compassft.com). The ETC securities provide you with exposure to a diversified basket of major crypto assets without requiring you to acquire ownership of those individual crypto assets in a digital wallet. ETC securities can be purchased or sold on one or more stock exchanges. Each ETC security corresponds to a specific amount of underlying crypto asset(s), known as the "Coin Entitlement. Each coin entitlement is reduced on a daily basis to reflect the product fee. The level of the fee and the current coin entitlement for each ETC security are specified on www.etf.dws.com. The issuer publishes a calculated daily value per security which equals the price of the underlying crypto assets in the basket, multiplied with the relevant coin entitlement. This value does not equal the relevant secondary market price (for purchase or sale). The issuer will seek to hold a sufficient amount of the underlying crypto assets to cover its obligations under the ETC securities. On redemption, the execution agent will sell the underlying crypto assets and proceeds will be used to pay amounts due to security holders. On redemption, it is intended that the ETC security will become payable in cash at an amount equal to the net proceeds of the sale of the underlying crypto assets equal to the relevant coin entitlement less the relevant costs and fees relating to the redemption. However, since the ability to make such payment is dependent on whether there is sufficient proceeds from the sale of the underlying crypto assets available, security holders may receive no payment in certain circumstances. ETC securities will not pay periodic interest. The value per ETC security and the secondary market price of the ETC securities can go down as well as up throughout the term of the ETC securities. The ETC securities are not principal protected and you may lose some or all of your investment. Investors should be aware that upon investing, they will not take delivery of any underlying crypto assets. More detailed information on the issuer of the ETC securities, such as the prospectus (in English language) as well as the annual and semi-annual report (in English language), can be obtained free of charge online at www.etf.dws.com. For more details about the ETC securities, please refer to the prospectus, which is available at www.etf.dws.com.

Intended Retail Investor

This ETC product is a complex product and is only intended for informed retail investors who: (i) understand the speculative nature of the underlying asset(s), (ii) have a long-term investment horizon of at least 5 years, (iii) have average knowledge and/or financial industry experience and understand the significant risks associated with various crypto assets, and (iv) are prepared to accept a high risk of loss (including up to complete loss) of invested capital and understand that crypto assets may not have any intrinsic value.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you.

The following applies if you subscribe to or settle ETC securities in a currency other than the currency of the securities: Please be aware of currency risk. You will receive payments in a different currency and therefore your final return will depend on the exchange rate between the two currencies. This risk is not taken into consideration in the indicator shown above.

You may lose some or all of your investment.

The following risks could be of particular significance for the ETC securities:

- An investment in the ETC securities is not the same as a direct investment in the relevant crypto assets, which comprise the index. The ETC securities value depends on the price of the underlying crypto assets and it could fall for long periods.
- The index may be subject to adjustments, which may not be reflected in the value of the ETC securities. Performance of the index and the ETC securities may deviate.
- Crypto assets face distinct market risks (high price volatility and bankruptcies of large crypto asset service providers), technical risks (private key storage risks, protocol flaws and hacking risks), legal and regulatory risks (changing legal and regulatory classification of crypto assets), operational

risks (settlement and operational disruption risks) and technology risks (blockchain technology and fraud risks).
A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
This product does not include any protection from future market performance so you could lose some or all of your investment.
If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between January 2025 and June 2026.

The moderate scenario occurred for an investment in the benchmark between October 2020 and October 2025.

The favourable scenario occurred for an investment in the benchmark between November 2016 and November 2021.

Recommended holding period: 5 years.			
Example Investment: USD 10,000.			
		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	370 USD	70 USD
	Average return each year	-96.27 %	-62.72 %
Unfavourable	What you might get back after costs	2,160 USD	4,710 USD
	Average return each year	-78.43 %	-13.98 %
Moderate	What you might get back after costs	14,450 USD	93,120 USD
	Average return each year	44.49 %	56.25 %
Favourable	What you might get back after costs	696,140 USD	3,470,900 USD
	Average return each year	6,861.35 %	222.17 %

What happens if DWS Investments UK Limited is unable to pay out?

DWS Investments UK Limited as PRIIPS manufacturer of the ETC securities is not obliged to make any payment in relation to the ETC securities. Xtrackers Digital Markets ETC AG is obliged to make payments under the ETC securities. If Xtrackers Digital Markets ETC AG fails to make a payment when due, the trustee (Vistra Capital Markets Trustees Limited) can enforce the security over the underlying crypto assets deposited with the custodian. Once the trustee has enforced the security it can then sell the underlying crypto assets and use the proceeds of this sale to pay amounts owed to you under the ETC securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETC securities. The product is a debt instrument and as such is not covered by any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	65 USD	3,066 USD
Annual cost impact (*)	0.7%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 57.3% before costs and 56.2% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 USD
Exit costs	We do not charge an exit fee.	0 USD
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	0.65% of the value of your investment per year. This is an estimate.	65 USD
Transaction costs	We do not charge transaction costs.	0 USD
Incidental costs taken under specific conditions		
Performance fees	We do not charge a performance fee.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

This product has no required minimum holding period but is designed for long term investment. However, the product may terminate early and may also be sold on the secondary market.

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all. The ETC securities may be redeemed if: (1) we redeem all of the ETC securities in the series following thirty days' calendar written notice to you; (2) an event of default occurs; or (3) an early redemption event occurs. A detailed description of early redemption events and events of default can be found in the Base prospectus available at www.etf.dws.com

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:

Postal Address: DWS Complaints Officer, 21 Moorfields, UK - London EC2Y 9DB; Email: complaints.etcs@list.db.com

We will then handle your request and provide you with feedback as soon as possible. We have a summary of our complaints handling procedure available free of charge online at www.etf.dws.com.

Other relevant information

Taxation regimes applicable to the security in your jurisdiction may affect your personal tax situation. Prospective investors should inform themselves of, and where appropriate take advice on such taxation regimes. Previous performance scenario calculations can be found under www.etf.dws.com.
