| ▲ 0.27%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | ▲ 0.33%   |
| Benchmark : ICE BofA US 3-Month Treasury Bill Index                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |           |
| <b>Markets</b> Following June’s memorandum of understanding (MOU), hopes for a sustained easing of Middle East tensions faded as geopolitical risks re-emerged in early July, driving oil prices and US Treasury yields higher. At its July meeting, the Federal Reserve voted 9-3 to keep rates unchanged at 3.50%-3.75%, citing solid economic growth, resilient labour markets, and still-elevated inflation. Markets were supported by softer inflation and wage data, which reduced expectations of further near-term policy tightening, but renewed geopolitical uncertainty pushed longer-dated yields higher over the month. |           |
| <b>Helped</b> Carry was the primary contributor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |           |
| <b>Hurt</b> Curve positioning and modest spread widening detracted from performance as front-end yields rose.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |           |
| <b>Outlook</b> The inflation and rate outlook remains closely linked to developments in the Middle East. Energy prices will be a key variable, with further volatility likely to influence inflation expectations, central bank policy and fixed income market performance.                                                                                                                                                                                                                                                                                                                                                          |           |

Past performance and forecast is not a reliable indicator of current and future results.

## Fund Overview

### Investment objective

The Sub-Fund aims to provide current income while seeking to maintain a low volatility of principal.

## Month in Review

- **Front-end yields moved higher as the US-Iran conflict re-accelerated.** One-year US Treasury yields increased 6 basis points (bps) to 4.04% over the month. The two-year increased by 12bps to 4.29% and the five-year increased 22bps to 4.45%.
- **Investment-grade (IG) credit spreads moved 3 bps wider** over the month. The Bloomberg 1-5 Year US Corporate Index option-adjusted spread (OAS) closed at 59 basis points.
- **The desk held duration and spread duration over the month** at 0.76 years and 0.85 years, respectively. The desk team is comfortable maintaining a modestly long duration position and believes that the Fed will remain on hold for a large part of the year.

## Looking Ahead

- **If geopolitical pressures ease and energy prices cool**, inflation should continue to moderate and economic activity should benefit. For now, our base case is that growth runs near trend, supported by still-healthy business investment – particularly tied to technology and artificial intelligence (AI) – and consumer spending that has held up better than expected, especially among higher-income households.
- **Inflation dynamics remain central to the policy path.** We continue to expect the Federal Reserve to keep rates on hold through year-end, even though markets still price in one to two 25-bp hikes. A hike as early as September is possible if inflation proves more persistent or if energy-related price pressures broaden, but we would view any move this year as a “fine-tuning” step rather than the start of a prolonged hiking cycle.
- **More hawkish views** have been most evident among rotating regional bank presidents rather than longer-tenured governors, suggesting that – even if additional tightening occurs – further hikes into 2027 would likely be limited.

RISK PROFILE

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency. Asset-backed, collateralised loan obligations and mortgage-backed securities may be less liquid than other securities in which the Sub-Fund will

invest, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying assets are not met. Exclusion of issuers that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy. The Sub-Fund may be concentrated in the banking industry and in the US sectors, markets and/or currency. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.

The risk indicator assumes you keep the product for 1 year. The risk of the product may be significantly higher if held for less than the recommended holding period. In the UK, please refer to the synthetic risk and reward indicator in the latest available key investor information document.

FOR PROFESSIONAL CLIENTS/QUALIFIED INVESTORS ONLY - NOT FOR RETAIL USE OR DISTRIBUTION

The products mentioned in this document have been registered for public distribution in certain jurisdictions, which may include EEA countries, Switzerland and the UK. Certain share classes may not be authorised or their offering may be restricted in your jurisdiction. It is each investor's responsibility to ensure compliance with local laws and regulations. Please contact your J.P. Morgan Asset Management representative or refer to the latest available Prospectus, the Key Information Document (KID) and any applicable local offering document for further information. Prior to investing in a product, investors are advised to take all necessary legal, regulatory and tax advice on the consequences of an investment in the products. Shares or other interests may not be offered to or purchased directly or indirectly by US persons. All transactions should be based on the latest available Prospectus, KID and any applicable local offering document. These documents together with the annual report, semi-annual report, instrument of incorporation and sustainability-related disclosures, are available in English from JPMorgan Asset Management (Europe) S.à r.l., 6 route de Trèves, L-2633 Senningerberg, Grand Duchy of Luxembourg, your financial adviser or your J.P. This material is confidential and intended for the addressee only and do not constitute a public offering. The investment funds and their shares as mentioned in this material are not registered with LatAm authorities for local public offering.

**For Panama:** These securities have not been listed with the Superintendence of the Securities Market and neither has any offering, sale or transaction with them. The listing exemption has been made based on Article 83 (3) of Decree Law No. 1 of July 8, 1999 (Institutional Investors). Consequently the tax treatment established under Articles 269 to 271 of Law Decree 1, dated 8 July 1999, does not apply. These Securities do not fall under the supervision of the Superintendence of the Securities Market.

**For Uruguay:** This fund is not an investment fund governed by local law 16,774, is being marketed on the basis of a private placement exemption and is not registered. For further information about the fund, the investors shall contact JPMorgan directly.

**For Chile:** ESTA OFERTA PRIVADA SE INICIA EL DÍA DE RIGISTRO EN CCR (WWW.CCR.CL) Y SE ACOGE A LAS DISPOSICIONES DE LA NORMA DE CARÁCTER GENERAL N° 336 DE LA SUPERINTENDENCIA DE VALORES Y SEGUROS, HOY COMISIÓN PARA EL MERCADO FINANCIERO. ESTA OFERTA VERSA SOBRE VALORES NO INSCRITOS EN EL REGISTRO DE VALORES O EN EL REGISTRO DE VALORES EXTRANJEROS QUE LLEVA LA COMISIÓN PARA EL MERCADO FINANCIERO, POR LO QUE TALES VALORES NO ESTÁN SUJETOS A LA FISCALIZACIÓN DE ÉSTA. POR TRATAR DE VALORES NO INSCRITOS NO EXISTE LA OBLIGACIÓN POR PARTE DEL EMISOR DE ENTREGAR EN CHILE INFORMACIÓN PÚBLICA RESPECTO DE LOS VALORES SOBRE LOS QUE VERSA ESTA OFERTA. ESTOS VALORES NO PODRÁN SER OBJETO DE OFERTA PÚBLICA

MIENTRAS NO SEAN INSCRITOS EN EL REGISTRO DE VALORES CORRESPONDIENTE.

**For Chile** (funds that are registered with CMF): The Fund is domiciled in Luxembourg, therefore, the investors’ rights and obligations will be governed by the laws of Luxembourg, and the investors must inform themselves about the way and means to enforce their rights. The CMF supervision will be exclusively focused on the compliance with the information obligations contained in NCG 352. Therefore, the control and supervision of the Fund will correspond to their home state regulator. The public information about the Fund will be exclusively that which the Luxembourg regulator requires. The Fund observes the Accounting and Auditing rules enacted by Luxembourg regulators, which may be different than the ones enacted by Chilean regulators. Pursuant to article 196 of the Chilean Securities Market Law (the “Law”), in case of violation of any regulations issued by CMF, the Fund, intermediaries, foreign securities depositories and any other person involved in the registration, placement, custody, trading or otherwise of foreign securities will be subject to the sanctions contained both in DL N° 3538 and in the Law. Investors may obtain more information about the Fund in the CMF website (<http://www.cmfchile.cl>).

**For Mexico** (funds that are listed on the Mexican Stock Exchange): the ETF presented is listed in the international quotation system of the Mexican Stock Exchange (Sistema Internacional de Cotizaciones de la Bolsa Mexicana de Valores - SIC), which not imply a certification of the performance of the ETF.
